May 21, 2017

1 INTRODUCTION

Makerere university is a ugandan higher institution of learning located in the ugandan capital kampala. It has registered tremendous success inform of prominent alumni,good staff, and structures. Data collection will be carried out in the University and among the students.

2 KIND OF DATA

Most students majorly the ones that reside in halls complain of many issues like inadequate water, less security,poor environment,congestion among many others. Other students who commute still have issues they raise for example unfavourable lecture times, amount of tution, security and many others. This data collection task is aimed at unearthing all these problems so as to be presented to the relevant parties for consideration. Data to be collected includes food eaten, security, the nature of environment, what the students would like to see as a change

3 PROBLEM TO BE SOLVED

The exercise will bring issues raised to the concerned parties and help find means of defeating them. It will also enable the voice of the unheard who are the students to the limelight. The data collected will enable improved

performance from the students since real disturbing issues will be put in the eyes of the administrators.
